ULTIMA SERIES

COVERMASTER Ultima Series covers are manufactured using the knife/spread coating process. Knife/spread coating literally coats the woven polyester core with liquid polymer to produce various weights of covers, depending on the amount of polymer. The knife applies the polymer under pressure thereby fully saturating the core’s weave to produce a single, totally integrated material after cooling. Because the coating cannot separate from the core, knife/spread coated materials are more durable and maintain their appearance, even under frequent use.

While some companies simply offer covers by weight, we believe that better surface protection means better performance. That is why our Ultima Series far exceeds any other cover available. Made from the highest quality chemical components, the Ultima Series Gym Floor Covers are safer and more durable than a 3-ply laminated or extruded fabric. In terms of chemistry, the compound consists of: more permanent plasticizers for greater compound performance; the highest performing lightfast pigment for superior color stability; quality resins for a stronger performing polymer compound; and required additives for flame and anti fungal resistance.

Additionally, we finish each Ultima Series cover with its own unique certified ADA compliant anti-slip decorative pattern. Not only does this create a safer surface to walk on for all patrons, but it also enhances the appearance of any room. While competitive models are simply standard tarps that look as such, the Ultima Series covers create an elegant setting for any event.

No other company puts as much research, time and effort into creating better Gym Floor Covers than Covermaster. The result of this effort is the Ultima Series.

**INSTALLATION TYPES**

- **PLYWOOD BACKED WALL PADS**
  Plywood backed pads are permanently mounted to the wall with a standard 1" lip at the top and bottom for easy installation. Pads are most commonly 2' wide by 5', 6' or 7' high. Custom sizes and Optional Aluminum J-Channel are available.

- **SEWN WALL MATS - GROMMETS**
  Sewn wall mats are vinyl enclosed and can be made in any size up to 4' x 6'. An integral vinyl flap on the top and bottom of the pad has grommets to allow for easy installation and removal, and can be installed with either screws or hooks. Custom sizes are available.

- **"Z" CLIP MOUNTING SYSTEMS**
  This system makes it easier to install and remove plywood backed wall pads. The top 1" lip has been replaced by the Z Clip Mounting System. This mounting system eliminates any unsightly mounting hardware or trim at the top of the pad for a clean smooth look. Individual panels are easily removed for future service or vinyl repair.

- **SEWN WALL MATS - VELCRO**
  Pads are used in combination with Velcro hanging rails to make mounting and removal a breeze. Loop Velcro fasteners are sewn to the backside of the pads for mounting to the Velcro hanging rails, which are mounted permanently to the wall with the appropriate anchors.

THREATS TO GYM FLOORS
COURTCLEAN® helps prevent damage to your playing surface caused by:

- **DIRT, DUST, GRIT AND SAND:**
  These elements can cause serious damage to hardwood floors. A full team running on a dirty surface acts as sandpaper that wears away the floor’s shiny finish.

- **WATER AND OTHER SPILLS:**
  Liquids can cause dangerous slipping situations, damage the finish of the floor and over time warp a poorly finished hardwood floor.

- **FIXTURES/STANDS:**
  Contact points can damage the surface of your gym floor. Platforms, speakers, fixtures and seating can also cause scuffs on the floor's finish. Use of a Covermaster protective gym floor cover is highly recommended.

Subject: Vehicle purchase

Village Administrator Tilton,

We have been searching for vehicles to enhance our fleet and keep up to date with the needs of the departments we assist. We are requesting to purchase a 2015 Polaris Ranger Crew 570.

This is an all terrain vehicle that can carry 4 (including driver) personnel. This vehicle will allow us to get resources to areas quickly and effectively in instances where a regular 4x4 vehicle cannot and can patrol areas that may be too small or unfit for regular patrol vehicles. There are many accessories that may be purchase to expand its use. For instance an attachment may be put on the cargo body to allow for a medic and a stretcher to be placed in the rear of the vehicle. As well as brush style firefighting equipment. Other wise the cargo body would allow for a wide array of supplies or equipment to be moved.

The Ranger Crew 570 comes with a government discount at $11,887.00 which comes in under our budget of $12,000.00 for a new vehicle. They are currently available and in stock at Shorewood home & auto in Cete, we will be able to take it there for service as well. As we are buying new it will come with a 3 year bumper to bumper warranty and a 5 year power train warranty.

I believe that this vehicle will benefit the Public Safety teams of the Village of Steger and the surrounding areas! Please find attached a picture of vehicle.

As always thank you for your time

Complete Streets

What is it?
A Complete Streets policy ensures that...projects are planned and designed to meet the needs of every community member, regardless of their age, ability, or how they travel. Doing so allows a community to save money, accommodate more people, and create an environment where every resident can travel safely and conveniently.
– National Complete Streets Coalition

The Complete Streets concept focuses not just on individual roads but on changing the decision-making and design process so that all users are routinely considered during the planning, designing, building and operating of all roadways. It is about policy and institutional change.
– John LaPlante and Barbara McCann, ITE Journal

What it is not:
• One “special” street project
• A design prescription
• A mandate for immediate retrofit
• A silver bullet; other issues must be addressed, such as land-use, transportation demand management

What are the benefits?
Complete Streets bring many types of benefits to a community:

Equity

One in ten households don’t own a car. Many Americans are too young to legally drive and some older adults can’t safely drive due to diminished visual abilities. Some Americans have a disability that prevents them from driving, others can’t afford to own and maintain a car. Complete Streets gives people who can’t or don’t drive access to jobs, schools, grocery stores, clinics, and other places that they need to go.

Safety

In 2014, about 33,000 Americans died in motor vehicle crashes, and 2.3 million people were injured. Illinois lost 924 people to car crashes that year, an average of over two people per day.¹

Street design can improve the safety of a corridor. A study of 15 lane reduction projects (a.k.a. road diets) in Iowa found a 34% reduction in crashes that resulted in injury.² Medians, speed bumps, and other traffic-calming infrastructure can reduce the number of pedestrian injuries by up to 15%.³

² Federal Highway Administration, U.S. Department of Transportation, date unknown
³ Wilson, A., 2012
A raised pedestrian median can drastically improve safety by shortening crossing distances and improving the visibility of the crosswalk. Raised medians and pedestrian refuge areas at marked crosswalks see a 46% reduction in crashes involving pedestrians.4

Economy

The average American family spends 19% of their income on transportation costs, the second largest expenditure after housing. In auto-dependent areas, the transportation costs can rise to 25% of a families' budget.5 Recreational trails and walkable “Main Street” areas can also attract public and private investment. Complete Streets can also save taxpayer dollars by reducing maintenance costs and costly roadway expansions.

Health

People who walk, bicycle, and take public transit integrate more activity into their daily lives. People who commute by public transit, for example, take 30% more steps per day than those that rely on cars. This simple act can help reduce a person’s vulnerability to diseases such as diabetes, cardiovascular disease, and some types of cancer.6

Environment

By providing an alternative to driving, Complete Streets can reduce greenhouse gas emissions and air pollution. Reductions in particulate matter, ozone, and other pollutants benefit human health. On days with less air pollution, children and adults with asthma, respiratory, and cardiovascular diseases make fewer emergency room visits.

Community

In some communities, the street network can comprise more than 40% of public land. By calming traffic and reclaiming the right of way for all users, Complete Streets help create public spaces that foster social connections between neighbors and community members. Parklets, small parks that are made from one or a few parking spaces, are one way of repurposing the public right of way.
